**Minimizing your Facebook Profile**
- Only establish and maintain connections with people you know and trust. Review your connections often.
- Assume that ANYONE can see any information about your activities, personal life, or professional life that you post and share.
- Ensure that your family takes similar precautions with their accounts; their privacy and sharing settings can expose your personal data.
- Avoid posting or tagging images of you or your family that clearly show your face. Select pictures taken at a distance, at an angle, or otherwise concealed. Never post Smartphone photos and don’t use your face as a profile photo, instead, use cartoons or avatars.
- Use secure browser settings when possible and monitor your browsing history to ensure that you recognize all access points.
Do not login to or link third-party sites (e.g. twitter, bing) using your Facebook account. “Facebook Connect” shares your information, and your friends’ information, with third party sites that may aggregate and misuse personal information. Also, use as few apps as possible. Apps such as Farmville access and share your personal data.
